DETAILED ACTION

This Office action is in response to the amendment filed December 31, 2002 in which claims 1, 2 and 5-7 were amended, claims 3 and 4 were canceled and claims 8-28 were added.

The previous rejection of the claims under 35 USC 112, second paragraph is withdrawn in view of the amendment to the claims.

The rejection of claim 1 under 35 USC 103 (a) as being unpatentable over Applicant's admitted prior art is withdrawn in view of Applicant's arguments and the translation of the reference that is cited in the specification.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 2 and 5-28 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the specification for the language "as a result of such conversion, generates an amount of CO₂ compatible with the respectively desirable atmospheric CO₂ level." See claims 1, 13, 14, and 22.

The specification also does not support the language "a synthesis gas for further industrial use" (see claim 13).

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claim 1 is rejected under 35 USC 103 (a) as being unpatentable over Pilipski (US 4,318,710) for the reasons of record.

Applicant argues that Pilipski is only concerned with providing charcoal as a renewable energy source and is not concerned about the greenhouse effect.

Pilipski tests a portion of the charcoal to determine its heat of combustion and the rest is stored for commercial sale. This teaching suggests Applicant's step of retrievably bunkering a portion of the charcoal and the step of converting a portion into energy wherein CO₂ is released into the atmosphere.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1714

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
